

Education

Batangas State University

BS Information Technology Major in Service Management

Malvar, Batangas

June 2025

Experience

Gemini Agri Farm Solutions Corp.

IT Business Solutions Staff

Sto. Tomas, Batangas

June 2026 – Present

- Set up and configured PCs, printers, email, software, and local network shared folders while providing day-to-day IT troubleshooting and technical support.
- Supported field operations through database access, material requests, and document preparation while creating company IDs, T-shirts, social media promotions, and tarpaulins using Adobe Photoshop and Canva.
- Managed WordPress website updates and social media content while integrating AI-powered tools to automate tasks and improve workflow efficiency.

Nexpereon Multipurpose Cooperative

Data Encoder

Cabuyao City, Laguna

January 2026 – May 2026

- Handled payroll encoding, backdated financial records, and document management while ensuring data accuracy and organization. Utilized VBA Editor and Microsoft Excel to reconcile financial discrepancies and assist in administrative tasks. Also provided basic IT support including laptop maintenance, software troubleshooting, and system updates for office operations.

Arktech Philippines Inc.

Software Developer Internship

Sto. Tomas, Batangas

February 2025 – May 2025

- Developed and deployed a PHP web application using AJAX-powered asynchronous operations, dynamic DataTables integration, and an administrative CMS to streamline data management and improve user workflows.

Projects & Independent Development

Projects

Software Developer

Remote

August 2024 – December 2025

- **SohoCafe** – Contributed and built a complete cafe management and ordering platform built with pure PHP and MySQL on the WAMP stack, implementing intuitive ordering flows, a comprehensive admin dashboard for product and inventory management, and sales analytics reports that streamlined operations.
- **ARtifacts Explorer (AR)** – Developed an augmented reality application using Unity & C# that integrates historical artifacts into an audible and interactive educational experience for museum visitors.
- **Defect Detector** – Developed a metal defect detector using Python and Computer Vision techniques to automatically identify surface defects such as bumps, scratches, dents, and other imperfections on metal parts.
