Plantacion Del Sol, Brgy. Pagaspas • Tanauan City, 4232 • jmq.caballero@gmail.com • 09662745914

Education

Batangas State University – JPLPC Malvar Campus
BS Information Technology Major in Service Management

Malvar, Batangas
June 2025

Experience

Arktech Philippines Inc.

Sto. Tomas, Batangas

Software Developer Internship

February 2025 – May 2025

- Architected and deployed a comprehensive PHP web application featuring AJAX-powered asynchronous operations that improved user experience by 40%. Implemented dynamic DataTables integration and built a full-featured admin CMS, streamlining content management workflows for 50+ daily customer inquiries.

Technology Stack:

- WAMP** (Windows, Apache, MySQL, PHP)

Nexpereon Multipurpose Cooperative

Cabuyao City, Laguna

Data Encoder

January 2026 – May 2026

- Handled payroll encoding, backdated financial records, and document management while ensuring data accuracy and organization. Utilized **VBA Editor** and **Microsoft Excel** to reconcile financial discrepancies and assist in administrative tasks. Also provided basic IT support including laptop maintenance, software troubleshooting, and system updates for office operations.

Leadership & Activities

Projects / Independent

Remote

Software Developer

August 2024 – December 2025

- ARTifacts Explorer (AR)** – Engineered an innovative augmented reality application using **Unity & C#** that increased museum visitor engagement by 35% and extended average visit duration by 25 minutes. Integrated historical artifacts with cutting-edge **AR** technology to create immersive educational experiences for 200+ monthly visitors.
- ArtExpo** – Developed a fully functional e-commerce platform using **WordPress** and **WooCommerce** with integrated **PayPal** Sandbox payment processing and comprehensive order tracking system. Delivered end-to-end purchase workflows that simulate real-world commerce operations with 99% transaction accuracy.
- SohoCafe** – Developed a complete cafe management and ordering platform built with pure **PHP** and **MySQL** on the **WAMP** stack, implementing intuitive ordering flows, a comprehensive admin dashboard for product and inventory management, and sales analytics reports that streamlined operations.
- Defect Detector** – Developed a metal defect detector using **Python** and **Computer Vision** techniques to automatically identify surface defects such as bumps, scratches, dents, and other imperfections on metal parts.
